"CiSS"

FUTURES SUPPLIES

SERVICE **QUALITY**
VALUE & **RELIABILITY**

HISTORY

When talking about moving a company from a small business company to be one of the leading market companies, then CiSS is the best example.

Established in 1989 under the name of MCS by three communication engineers friends dreamt to be a real adding value to the Egyptian Market.

They started as a sole distributor for one of the main players in the communication world by that time, ITT Italy, it was the first time that this product was introduced to the Egyptian Market, they did very well and became very well known by their unique product and post sales service as well.

It was only six years that their success encourages Nortel Networks (Northern Telecom by that time) to nominate MCS as their distributor in Egypt. It was a real challenge for MCS, a reconstruction had been made in the company organization, that allowed them to big projects, big accounts and strategic ones as well.

By the year 1995, MCS was almost the preferred supplier in Ministry of Interior and Ministry of Defence in addition to a very good reputation between the Egyptian Consultant offices.

Telephone systems was just an entrance for MCS, the portfolio had to be completed, our eyes were on turn-key projects in the IT field. Data Networks as a part of Nortel portfolio was added to our experience, followed by Cabling Solutions, Security, Light Current, all offered as an integrated solution.

As the telephone system was just an entrance to us, also the Egyptian Market was an entrance to the Middle East. We had to prove that Egypt was and is and will be the region leader.

As a leader company; international contracting companies found all their needs in MCS. We had inclusive agreements with a lot of International Contracting Companies working in Egypt and the Middle East like:

- Contrack International Inc.
- American International Contractors (AICI)
- Washington/ Contrack Group
- Archirodon
- Osman sons

Year 2012 was the establishment of:

Communication Information Systems & Supplies "CiSS"

As a sister company for MCS

To take over all MCS activities, continue improving, growing, complete its mission, achieve the desired goals and to remain one of the largest companies that provide integrated solutions in the Middle East, provide renewable technology guaranteed by our motivated team with a strong determination to serve customers.

"CiSS" is proud to represent major international companies in the field of telecommunications, smart devices for monitoring, security,

X-Ray detection devices, Equipping and managing car parks.

COMPANY OVERVIEW

- CiSS is a Telecom & Information Technology Professional Services firm based in Egypt.
- CiSS is a Communication Network Solutions Company characterized by its capability to offer sufficient resources and its agility to respond effectively to different market segments.
- At CiSS, quality is not an option, but a habit. Our objective is to provide innovative technological solutions to our clients aimed at meeting and exceeding their expectations by maintaining a high standard of quality and services.
- We are fully committed to deliver world class IT solutions that are based on quality, cost effectiveness, and customer satisfaction through the integration of professionals, process, and business systems.
- We are eager to apply new ideas in order to create a similar experience with technology and improving the way our customers work and adding value to their lives.
- CISS, prides itself for its ability to respect schedules and to deliver its high-quality services at the promised time interval to its clients.

OUR VISION

To provide innovative technological solutions to clients, meeting and exceeding their expectations while maintaining exceptional quality.

- Make our clients updated with the latest version of hardware & software no matter the brand is but our target is to deliver the perfect solutions.
- To achieve your targets.

OUR MISSION

To develop world class Telecom Solutions that are based on quality, cost effectiveness, and customer satisfaction through the integration of people, process, technology, and business systems.

- In order to achieve this mission of excellence, we:
 - ✓ Constantly evolve our technology and know-how to keep our customers above, ahead, informed and on-track.
 - ✓ Perform in-depth studies of our clients' business needs and goals and deliver solutions which are not only meet their expectations but exceed them.
 - ✓ Communicate with our clients to determine their evolving needs so that they are well adjusted for long-term growth.

OUR STRATEGY:

Customer Satisfaction is the name of our game, professionalism is our tool, integrated solutions is what we offer.

Customer Satisfaction means:

- ✓ To satisfy our customer is to provide what is needed and not what is asked for.
- ✓ To satisfy our customer is to transfer the latest technology to our customers, teaching, and learning from/with our customers.
- ✓ To satisfy our customer is to build a trustful respectable relationship

PROFESSIONALISM:

- Time and accuracy are our main address.
- Well trained and educated staff are our representatives.
- Pre-sales consultancy is one of our powerful points.
- Experienced and trained installation staff.
- On time and regular maintenance is what we provide.

INTEGRATED SOLUTIONS:

- We offer solutions not just products.
- In order to guarantee Customer Satisfaction and Professionalism our experienced technical team provides integrated solutions and workable solutions.

MAINTENANCE AND AFTER-SALES:

Dedication to service quality is essential to our success.

Quality support for quality communications systems and excellence through teamwork and empowerment are the goals of CISS to provide its customers with high standards of pre-sales support and after-sales services.
